

Danila Surkov

System Analyst Middle+ · integrations & APIs

Target roles: System / Integration Analyst · WMS, logistics, fintech, enterprise

-50% labour on a process
End-to-end integration rolled out across the retail network

Faster to production
Standardized REST/OpenAPI contracts and alignment

Fewer post-release issues
Precise requirements and service interaction scenarios

PROFILE

System analyst in integration and enterprise programs: I turn complex requirements into REST/OpenAPI contracts and Kafka/RabbitMQ async flows, then own the slice through production. I work at the business–engineering boundary, join architecture decisions, and debug incidents with logs and SQL. Strongest in integrations with WMS and government information systems.

SKILLS

APIs & integrations	REST	OpenAPI / Swagger	Kafka	RabbitMQ	event-driven	JSON	microservices
Data & SQL	SQL	PostgreSQL	operational reports	log analysis			
Analysis	UML	BPMN	use cases	interaction scenarios	dev tasking		
Delivery	Agile / Kanban	Confluence	Git	CI/CD	Python	C++	
Domains	WMS	government IS	retail networks	payments	information security		

EXPERIENCE

V6 Services (Виб Сервисес) · System Analyst (Middle+)

Sep 2024 — present · 2 yrs

Enterprise integrations / retail · REST, OpenAPI, Kafka, RabbitMQ, SQL, PostgreSQL, Confluence

- Delivered a full-cycle integration (requirements → launch) that **cut process labour in half across the retail network**.
- Designed REST APIs and service contracts in OpenAPI/Swagger; API standards sped up production releases.
- Designed Kafka and RabbitMQ event-driven integrations: async flows, service boundaries, contract ownership.
- Reduced incidents and post-release rework through precise requirements and interaction scenarios.
- Integrated with WMS and government IS: exchanges, statuses, discrepancies, operational support.
- Broke down requirements, tasked backend/frontend, ran grooming/planning, joined architecture decisions.
- SQL reports, log/production incident analysis, Confluence docs, stakeholder communication.

Best2Pay · System / Business Analyst intern → analyst

Apr 2024 — Nov 2024 · 7 mo

Payment / client solutions on legacy · intern Apr–Jul 2024, System / Business Analyst from Jul 2024

- Promoted intern → analyst in 3 months: from supporting the team to owning client-solution work.
- Reverse-engineered legacy behaviour and user journeys; proposed functional improvements.
- Elicited requirements, aligned specs for design and engineering, tracked process delivery, built an internal wiki.

Internships

IATE MEPHI · analyst intern · Jan 2024 — Apr 2024. Process and data analysis, system modelling, diagrams and analytical notes.

InfoTeCS · information-security analyst intern · May 2022 — Aug 2022. Security-contour processes, potential vulnerability analysis, new process descriptions.

EDUCATION

MEPHI, Moscow — Information Security, Master's	2020 — 2025
HSE University — Business Informatics, Master's	2018 — 2023
